Won't You Forgive
[3/4 time]

```
G                          D7          G
I know that I took  much more than I gave
    C                                 G
But now I confess what more can I do
                          D7
What more can I say  I know we could live
                  G
If you would forgive

I'm so sorry dear for things that I've done
    C                                      G
But if you leave me now then who'll be to blame
                         D7
You'll be the one  it's all up to you
                       G C G
Please won't you for-g-i-ve

       C                         G
You've so much to lose if you leave me
  C                             D7
I still love ya so please believe me

     G                       D7          G
I've done all I can  I'm down on my knees
C                                  G
One little chance is all that I ask
                               D7
I've even said please  it's all up to you
                       G C G
Please won't you for-g-i-ve
```
