Angel In Her Face

ANGEL IN HER FACE
sung by the Statler Brothers
from album Atlanta Blue (1984)

```
G                                      C                  G
 I miss the way she always knew when things were on my mind
                                       C     Am      D
I miss the way she'd always cling to every word of mine
  G                                  C           G
I miss the way that only she could put me in my place
    C              G                   C     D7     G
But most of all, I miss that look of angel in her face
```

Verse 2:
I miss the comfort of her kiss, the sounds of love we shared
I miss the touch of her warm hand that spoke 1000 words
I miss the soul her love could give to things so commonplace
But most of all, I miss that look of angel in her face

Bridge:

```
C               G           C                   G
 She was soft & lonely when she first came to me
      C                  G    C         Am   D
But I took her heart & only gave her misery
```

Verse 3:
I miss the cling she always had with eyes that worshipped me
I miss the soul that I could feel, the warmth that I could see
(key goes up half a step here):

```
  G#                              C#           G#
& as she lies beside me now, I know I can't erase
    C#                  G#                 C#    D#7      G#
The fact that I'm the one who took the angel from her face
```
