Just Any Day Now
Recorded by Doyle Lawson
Written by Aaron Wilburn and Eddie Crook

```
C         G            D7         G
Just any day now His face I'll see

                                 G7            C
Each time I stop and take the time to look around me
          G                                 D7
I see the signs of His appearing everywhere
             G                    G7           C
The things He said would come to pass are now before us
          G               D7                  G
And I can feel a strange excitement in the air

                  G7           C
Just any day now our Lord is coming
          G                        D7
He'll be returning for you and me
               G         G7             C
For I've been watching and I've been waiting
          G            D7         G
Just any day now His face I'll see

                              G7             C
Oh there's a longing in my heart for His appearing
            G                                 D7
I'll gladly leave behind these trials here below
          G                          G7          C
For this journey has been hard and I'm so weary
            G         D7                    G
But Lord I feel I'm so much closer to home
```

Repeat #2
