- Steam Powered Aero Plane

```
                          G                          Am
Well I dreamt I went away on a steam powered aeroplane.

                                C                          G
Well I went and stayed and I damn near didn't come back again.

                                                  Am
Didn't go very fast on a steam powered aeroplane,

                                        C                                  G
Oh the wheel went around, up and down, and inside and then back again.

Am                                      Bm
Sittin' in a 747 just watching them clouds roll by,

Am                                      G
Can't tell if it's sunshine or it's rain.

Am                                                G
Rather be sittin' in a deck chair high above Kansas City,

     Am      Am/B          C          C/E            D
On a genuine old-fashioned authentic steam powered aero plane.

Well I'd like to be a pilot on a steam powered aeroplane.
Well I'd pull that pilot wheel around and then back again.
Well, I'd wear a blue hat,yeah, that says Steam Powered Aeroplane
With letters that go all around the rim and then back again.
```
