Pray For The Boys-Scruggs and Flatt
Auth Carter Stanley and Ralph Stanley

```
G        C                          G
Don't forget to often pray for the boys so far away
                                   D7
They have gone to fill your place out there
       G                       C                G
They're on the battle line in defense of yours and mine
                   D7        G
Hold 'em up to God in humble prayer

                                              C                    G
When the smoke of the battle clears oft my eyes are filled with tears
                                D7
As I see some mother's son so still
     G                                  C              G
I am thankful for your prayers to the one who always cares
                         D7     G
And I pray that I may do His will
```

Repeat verse 1

```
                                   C           G
In the beach head far away goes a boy for you today
                                  D7
And I know he thinks of home and you
       G                                  C                        G
When in prayer you're head is bowed mention those who are out there now
                          D7     G
Pray the Lord today to Him be true
```

Repeat verse 1
